Product Certificate

JSC VertiClad Cladding System

3. Description of Building Method or Product

The JSC VertiClad Cladding System (the System) comprises: vertically fixed weatherboards installed over H3.2 treated timber castellated cavity battens to form either a 20mm cavity or a 45 mm cavity, fascia boards and moulding profiles.

JSC VertiClad Cladding System weatherboards are manufactured from the following materials; Western Red Cedar (Thuja Plicata), Alaskan Yellow Cedar (Cupressus nootkatensis), Radiata Pine – H3.2 (MicroPro® treated), Nordic Pine – H3.2 (MicroPro® Treated), ThermoPine H3.2 MicroPro® treated, TMT Amba, TMT Taiga RW, TMT Taiga WW, TMT Taxon or TMT Tuscan.

4. Intended use of Building Method or Product

The JSC VertiClad Cladding System is an external wall cladding installed over a 20 mm or 45 mm ventilated cavity.

5. New Zealand Building Code Provisions

The System if designed, used, installed and maintained in accordance with the conditions of this Certificate will comply with or contribute to compliance with the following performance provisions of the NZ Building Code:

Clause B1 STRUCTURE: Performance B1.3.1, B1.3.2, B1.3.4 for the relevant physical conditions of B1.3.3 (a), (f), (h), (j) and (m)

Clause B2 DURABILITY: Performance B2.3.1(b) and B2.3.2(b).

Clause E2 EXTERNAL MOISTURE: Performance E2.3.2, E2.3.5 (contributes to), E2.3.6 (contributes to), E2.3.7.

Clause F2 HAZARDOUS BUILDING MATERIALS: Performance F2.3.1.

6. Conditions and Limitations of Use

1. The system is certified for timber-framed buildings:
 - a. with walls designed in accordance with NZS3604:2011 Timber-framed buildings, as modified by Acceptable Solution B1/AS1 and within the scope of Acceptable Solution E2/AS1, Third Edition including amendment 10 (5/11/2020) Paragraph 1.1, or of at least equivalent stiffness to the framing provisions of NZS3604:2011, and situated in Wind Zones (as defined in NZS 3604:2011) up to and including Extra High; or
 - b. subject to specific engineering design in accordance with Verification Method B1/VM1 Amendment 20 up to a maximum design differential ultimate limit state (ULS) wind pressure of 2.5 kPa, and

This certificate is issued by an independent certification body accredited by JAS-ANZ, the product certification body appointed by the Chief Executive of the Ministry of Business, Innovation and Employment under the Building Act 2004. This certificate may only be reproduced in its entirety. It is advised to check that this certificate is currently valid and not withdrawn or suspended by referring to the Register of Product Certificates on the Building Performance website <http://www.building.govt.nz>. The purpose of construction site audits is to confirm the practicability of installing the product; and to confirm the appropriateness and accuracy of installation instructions. In issuing this certificate, Global-Mark has relied on the independent expert and/or laboratory advice or reports. In placing the CodeMark mark on the product/system, the certificate holder makes a declaration of compliance with the certification standard(s) and confirms that the product is identical to the product certified herein. The revision of all Acceptable solutions, Verification methods or standards referenced in this certificate are the current at the time of issuance of the certificate unless identified otherwise.

Product Certificate

JSC VertiClad Cladding System

- c. up to 10 m in height, and
 - d. with a risk score of 0-20, calculated in accordance with NZBC Acceptable Solution E2/AS1, Third Edition including amendment 10 (5/11/2020) Table 2, and
 - e. situated:
 - i. in all exposure zones (excluding microclimates) as defined in NZS3604:2011, Paragraph 4.2.4, and
 - ii. more than 1m from a relevant boundary
 2. The System shall be designed, used, installed and maintained in accordance the following sets of documents collectively referenced as the Applicable Technical Specification:
 - a. JSC Verticlad, Vertical Shiplap Weatherboard Cladding, Design Guide, Version 1.0, February 2025
 - b. JSC Verticlad, Vertical Shiplap Weatherboard Cladding, Installation Guide, Version 3.6, February 2025
 - c. JSC Verticlad System Shiplap Installation Checklist, v1.4, February 2025
 - d. JSC Exterior Timber Weatherboard Cladding, Maintenance Guide, Version 3.2, February 2025
 - e. Technical Drawings JSC Verticlad – Vertical Shiplap Weatherboards - Flexible Underlay 20 mm Cavity Fix, Version 2.5, 24/02/2025
 - f. Technical Drawings - JSC Verticlad – Vertical Shiplap Weatherboards - Rigid Underlay 20 mm Cavity Fix, Version 2.5, 24/02/2025
 - g. Technical Drawings - JSC Verticlad – Vertical Shiplap Weatherboards - Flexible Underlay 45 mm Cavity Fix, Version 2.5, 24/02/2025
 - h. Technical Drawings - JSC Verticlad – Vertical Shiplap Weatherboards - Rigid Underlay 45 mm Cavity Fix, Version 2.5, 24/02/2025
 3. The System shall:
 - a. be fixed over a ventilated cavity in conjunction with a flexible building underlay or rigid air barrier in accordance with the Applicable Technical Specification, and
 - b. be installed vertically on vertical, flat surfaces, and
 - c. use the components and board profiles as described in the Applicable Technical Specification (where these components are substituted with alternative products, these applications fall outside the scope of this certification), and
 - d. incorporate joinery that meets the requirements of NZS 4211:2008 including Amendment 1 for the relevant Wind Zone or wind pressure.
 4. Stainless steel or silicon bronze fixings shall be used with ThermoPine H3.2 MicroPro® treated, TMT Amba, TMT Taiga RW, TMT Taiga WW, TMT Taxon and TMT Tuscan weatherboards.

This certificate is issued by an independent certification body accredited by JAS-ANZ, the product certification body appointed by the Chief Executive of the Ministry of Business, Innovation and Employment under the Building Act 2004. This certificate may only be reproduced in its entirety. It is advised to check that this certificate is currently valid and not withdrawn or suspended by referring to the Register of Product Certificates on the Building Performance website <http://www.building.govt.nz>. The purpose of construction site audits is to confirm the practicability of installing the product; and to confirm the appropriateness and accuracy of installation instructions. In issuing this certificate, Global-Mark has relied on the independent expert and/or laboratory advice or reports. In placing the CodeMark mark on the product/system, the certificate holder makes a declaration of compliance with the certification standard(s) and confirms that the product is identical to the product certified herein.

Renewal Date: 20 July 2028

5. The designer shall provide a signed Declaration for submission with the building consent application that the use of this product in the proposed building work falls within the intended use of the system as described in this certificate and that all design conditions of this certificate have been met.
6. The installer shall supply a signed Declaration that the product has been installed in accordance with the installation conditions of this certificate, for consideration for issuing a Code Compliance Certificate (CCC).

7. Health and Safety Information

Standard industry safety practices and manufacturer safety requirements as detailed in the technical literature including the applicable SDS must be observed at all times.

8. Basis for Certification

The certification decision is based on independent technical review(s) of test report(s), engineering opinion(s) and other documented evidence(s), factory audit(s) and site review(s)

Code Objective Clause	Compliance pathway
Clause B1 STRUCTURE	Alternative solution based on NZS3604:2011 and comparison with E2/AS1 and testing using E2/VM1
Clause B2 DURABILITY	Alternative solution based on expert opinion and testing
Clause E2 EXTERNAL MOISTURE	Alternative solution based on verification method E2/VM1 test
Clause F2 HAZARDOUS BUILDING MATERIALS	Alternative solution based on expert judgement
