## INTRODUCTION

### Streamlined Timber Batten System: Effortless Elegance for Architectural Excellence

Internally, timber battens are a popular feature due to their natural aesthetic and warm character, eco-friendly attributes, and their ability to be coated, stained and treated to align with, or contrast against, the wider interior décor. The use of battens in bold horizontal or vertical layouts in ceilings and walls can create striking architectural features or accents. An extremely popular trend seen commercial and residential buildings nationwide, timber battens are a stylish, natural feature for any application. Additionally, they provide an excellent opportunity for seamless indoor-outdoor flow, seamlessly connecting interior spaces with the exterior, and extending the harmony of your design into the outdoor environment. This creates a sense of continuity and open space, enhancing the overall experience of the space.

Experience the seamless integration of form and function with the sustainably crafted JSC Clipp® Batten System. Featuring the Grad® aluminium rail with the Grad® patented clipping system, this solution offers a beautiful aesthetic while drastically reducing installation timeframes when compared with traditional timber batten systems. The sustainably sourced timber battens, are the stand out feature of this system and are expertly profiled right here in New Zealand. JSC is proud to offer this exclusive system to assist architects, builders, and home owners alike.

Hemlock Timber Battens on Grad® Rail & Clipping System

## KEY FEATURES

- 1. Effortless Installation & Maintenance:** The JSC Clipp® Batten System guarantees straightforward installation, allowing for easy removal and replacement of individual battens when necessary, thanks to the lightweight nature of the Grad® aluminium system. Additionally, the system facilitates easy access to system components, such as to your HVAC, that are behind the installed batten through a patented removal tool, allowing for convenient maintenance and access. This not only saves time and money but also ensures that the system remains manageable and convenient to work with.
- 2. Tailored Aesthetic:** Deliberate spacing between battens creates visual depth, and with a range of sizes available, allowing you can customise the look to meet your unique design preferences. We're also happy to discuss any bespoke projects or specifications you may need. The system boasts a sleek, fixture-free appearance, ensuring a seamless finish. Additionally the use of sustainably sourced JSC timbers offers a wide range of colours and grains to suit your architectural projects.
- 3. Specifically Designed for Walls and Ceilings:** The JSC Clipp® Batten System is expertly engineered for walls and ceilings, ensuring optimal functionality and visual appeal in these areas. The combination of the Grad® system's lightweight design and JSC's timber products ensures that the system remains manageable and convenient to work with, even in challenging install applications.
- 4. System Material Composition:** The JSC Clipp® Batten System is crafted with sustainably sourced timbers and the elements of the system, are recyclable. All components are selected for their eco-friendly attributes, ensuring a responsible choice for your architectural projects.
- 5. Tried and Tested System - Grad® Patented Clipping System:** For almost 20 years, the Grad® team has established itself as a product of excellence. This patented clipping system with invisible clips ensures a quality, reliable solution. This time-tested system provides peace of mind for your architectural projects.

## COMMON SPECIES USED

WESTERN HEMLOCK

TMT TAIGA

WESTERN RED CEDAR

TMT TAXON

Note: Other timber species may be available upon request. Talk to a JSC representative about specify project requirements

## FINISH, AVAILABLE SIZES & COATINGS

- Finishes:** Depending on the species and application requirements, timber battens can be provided dressed, bandsawn, and brushed finishes.
- Batten dimensions:** A select range of JSC timber species are available in combinations of 40×40, 90×18, 60×18, or 40×18 battens to achieve degrees of colour, texture or uniformity to complement your design context. Custom sizes are available on request.
- Coating options:** JSC Factory coats all timber battens, and can offer fire-retardant coatings for interior applications, to ensure optimal performance and safety. For advice on selecting the appropriate product and finish for your project, please contact JSC.
