

*A truly special and self-
sustainable home*

Project Timber.

JULY 2021 | MT COOK HOMESTEAD

The Project.

MT COOK HOMESTEAD, AORAKI

With the picturesque backdrop of Aoraki, this unique single-level homestead has put natural and recycled materials at the forefront of the design while ensuring to keep the beautiful historical elements intact by reusing materials from the original homestead of Mt Cook Station.

The collaboration between RW Design and Lone Pine Building was massively successful in materialising the owners dreams and aspirations for this historically inspired homestead.

Architect: RW Design Christchurch

Imagery: Registered Master Builders

Builder: Lone Pine Building Timaru

Interior Joinery: J-Mac Joinery Timaru

"With breathtaking views of Aoraki, this high-country masterpiece utilises materials that resonate with its scenic environment. The exterior features stonework and cedar board-and-batten, mimicking the alpine terrain. Inside is just as exquisite. With five bedrooms and four bathrooms, the focal point of the home is the grand living area, complete with fireplace and striking stone mantelpiece. Here, floor-to-ceiling windows allow you to take in the glorious panorama while warming by the fire as sunlight streams in."

- House of the Year Magazine

The Exterior.

WESTERN RED CEDAR BOARD & BATTEN WEATHERBOARDS

The owners of this luxurious single-level homestead wanted to tell a story of longevity, by marrying contemporary and historical styles and taking inspiration from the rugged and rustic surroundings. A major focus was using, and reusing natural and recycled materials of which some the station had on offer along with the addition of high-end elements that complimented and modernised this build.

On the exterior this spectacular home has utilised JSC Western Red Cedar cladding for the board and batten look, which was used exquisitely alongside Architecturally chosen classic stone elements.

This distinguished homestead pays tribute to its beautiful alpine surroundings and the historically rich area of Aotearoa.

The Interior.

WESTERN RED CEDAR DRESSED INTERNAL DOORS

The 5 bedroom, 4 bathroom home was thoughtfully and cleverly design. The use of a central custom Cedar double doors forms a self-contained two bedroom unit. With reclaimed ceiling beams that pulls ones eyes through the dining room to a featured fireplace of a lounge flooded with warm natural sunlight. This is finished off with an enormous window showcasing a panoramic view of the landscape.

Timber elements can be found all through the interior which brings the whole home together while drawing on the rustic nature of its surrounds. A truly special and self-sustainable home.

JSC Timber

World-class products & sustainable practices.

Established in 1900, JSC is New Zealand owned and operated. JSC is a leading manufacturer and supplier of quality hardwood and exotic softwood timber products.

Care for our natural resources and respect for our planet by giving back to the land from which we take by responsible sourcing. We work closely with clients and help them to select the the best product for the project ensuring it is fit for purpose and lasts. At JSC we do not only focus on sustainable products but sustainable buildings that last a lifetime.
