MARCH 2020

THE LANDING, WIGRAM SKIES

The Project.

THE LANDING, WIGRAM SKIES

Wigram Skies is an exciting community built on the site of the former Wigram Aerodrome, Christchurch. The Landing, at the heart of Wigram Skies, provides a convenient, modern and thoughtfully designed retail and mixed-use space for Wigram Skies residents and greater South West Christchurch.

WESTERN RED CEDAR WEATHERBOARDS

Buchan Group Christchurch architecturally designed a modern and innovative commercial complex, combining the use of JSC Timber VertiClad and RustiClad systems.

The client wanted warm, natural materials incorporated into the design, and the varying depths and widths available with the RustiClad and VertiClad helped to add character to the design, setting this project apart from the rest.

JSC Timber.

Leading the market with world-class products & sustainable practices.

Since 1900, JSC Timber has been a leading manufacturer and supplier of quality hardwood and exotic softwood timber products.

Our modern factory and highly-skilled staff allow us to create products and custom profiles in-house for added benefit and flexibility.

We pride ourselves on our relationships with our suppliers, and take care of our supply chain to ensure we purchase from reputable companies with a similar outlook for the future.
