Australian timber perfect for hardwood floors

Naturally durable

Hardworking timber
for flooring & decking

Straight, even
grain and texture

Blackbutt is a very dense hardwood, predominantly grown on the north coast of New South Wales and the southern coast of Queensland. Because of its durable and strong nature, this hardwood is commonly used for flooring, cladding, poles and more.

Blackbutt heartwood ranges from golden yellow to pale brown, sometimes with a slight pink tinge. The sapwood is much paler in colour, and can sometimes have small gum veins visible.

TECHNICAL INFORMATION

Colour	Attractive colouring from cream to pale brown, sometimes with a slight tinge of pink
Grain	Usually straight, with medium and even texture
Density/ strength	*900kgs/m ³ **Janka Dry Hardness: 9.1 kN Medium shrinkage rates apply
Durability	Class 1 for above ground use Class 2 for in ground use
Seasoning	Relatively easy to dry but can be prone to surface and end check if the process is hurried
Working qualities	Relatively easy to work, cuts easily and is also a good to fair bending timber
Uses	Applied and structural Flooring, Decking, Panelling, Poles, Sleepers, Pergolas, stairs and framework

Note: For comparable species speak to the JSC team about alternatives.

Disclaimer: JSC has endeavoured to ensure this information is accurate but recommends that for critical applications independent advice is obtained. These properties are only a guide, as timber is a natural product there will be variations within any species. * Air dry density (kg/m³) is average indication only and actual value may vary. ** The Janka Dry Hardness rating measures the hardness of the wood. The higher the rating the harder the wood. This information may be updated at any time.
