

Project Timber.

JUNE 2021 | THE HILTON HOTEL

The Project.

THE HILTON HOTEL, KAWARAU - QUEENSTOWN

Situated on the edge of Lake Wakatipu at Kawarau Falls Station, the 5 Star Hilton Hotel's natural materials palette accents were largely inspired by the local environment of the Central Otago region. With breathtaking views, the buildings have used the steep landscape to its advantage by anchoring themselves on the hillside and maximising the views from the hotel.

The Exterior.

RUSTICATED WEATHERBOARDS & DECKING

Peddlethorp Architects specified traditional and versatile JSC Rusticated weatherboards as it offers unique horizontal negative lines that accentuate the grain structure and natural beauty of the Western Red Cedar, making it a perfect choice to fit into the stunning Otago landscape.

Vitex decking has been used throughout the project. Vitex is a renowned choice for durable hardwood decking for its smooth fine grain and natural ageing to a silver-grey colour. JSC sourced Vitex is NEPCon Certified true Vitex which ensures that there is better land management and business practices that benefit people, nature and the climate.

The Interior.

WESTERN RED CEDAR BATTENS

The interior mimics the natural environment outside. The use of the Western Red Cedar battens inside has brought a natural warmth and tranquility to the interior of the Hilton. The use of timber is known for its health benefits. It is found that exposure to timber products and the use of it in interiors has similar health benefits to spending time in nature.

JSC Timber

World-class products & sustainable practices.

Established in 1900, JSC is New Zealand owned and operated. JSC is a leading manufacturer and supplier of quality hardwood and exotic softwood timber products.

By caring for our natural resources and respect for our planet by giving back to the land from which we take by responsible sourcing. We work closely with clients and help them to select the the best product for the project ensuring it is fit for purpose and lasts. At JSC we do not only focus on sustainable products but sustainable buildings that last a lifetime.
