Project Timber

APRIL 2020

PASSIVE HOUSE, WANAKA

The Project.

PASSIVE HOUSE, WANAKA

Sitting high above Wanaka with extraordinary views over the lake to the mountains beyond, this holiday home designed by Theca Architects is a high-spec Passive build project with demands for quality. The home is extremely comfortable year-round with an airtight building structure, exposed concrete floors and triple glazed, European tilt and turn windows.

WESTERN RED CEDAR WEATHERBOARDS

The architects chose JSC Timber for the supply of our Western Red Cedar weatherboards to ensure their quality requirements would be met, and for the variety of profiles offered – these include RustiClad weatherboards and accessories.

JSC Timber.

Leading the market with world-class products & sustainable practices.

Since 1900, JSC Timber has been a leading manufacturer and supplier of quality hardwood and exotic softwood timber products.

Our modern factory and highly-skilled staff allow us to create products and custom profiles in-house for added benefit and flexibility.

We pride ourselves on our relationships with our suppliers, and take care of our supply chain to ensure we purchase from reputable companies with a similar outlook for the future.
