SUMNER HOUSE

The Project.

SUMNER HOUSE

Located in the Eastern suburb of Christchurch, Sumner House is an innovative beachside residence designed by Ben Brady at Linetype Architectural and built by Craig Todd. The home features premium Radiata weatherboard cladding that is locally-sourced with a MicroPro treatment.

Exterior.

JSC RADIATA WEATHERBOARDS

Locally-sourced, FSC-mix Radiata weatherboards are supplied pre-treated with paint or oil, and an environmentally-friendly MicroPro treatment. Radiata weatherboards are #1 Premium clears, have no finger joints, and are machined thicker for added stability. Available in Vertical Shiplap, Rusticated, Bevelback, and Board & Batten options, Radiata weatherboards have a competitive price point and are government-approved for schools and Housing NZ.

JSC Timber.

Leading the market with world-class products & sustainable practices.

Since 1900, JSC Timber has been a leading manufacturer and supplier of quality hardwood and exotic softwood timber products.

Our modern factory and highly-skilled staff allow us to create products and custom profiles in-house for added benefit and flexibility.

We pride ourselves on our relationships with our suppliers, and take care of our supply chain to ensure we purchase from reputable companies with a similar outlook for the future.
