Knotty timber with personality and superior versatility

Natural stability
and durability

Codemark
certified

Rustic grade

Rustic Cedar has a beautiful colour, wonderful aroma, and superb durability. It is available at a comparatively lower price point than Western Red Cedar clears making it a desired choice for many consumers.

Rustic Cedar is light and easy to work with, which along with the combination of looks and finishes give it great versatility. The character of the knots in the wood provides a wide range of looks from sophisticated and elegant to rustic and charming. The tight knots remain sound and tight through the life of the build

Cambridge House NZ | Gary Todd Architecture

GRADE CHARACTERISTICS

Characteristics and limiting provisions are:

- Knots – unlimited sound tight; star checking
- and /or slight chipping permitted
- Checks – small surface
- Torn Grain – Light

The knots, burls, and naturally occurring markings which are of uniform distribution and added decorative characteristic of Cedar defines the visual character of this grade.

RUSTIC CEDAR APPLICATIONS

Rustic Cedar is extremely popular for exterior weatherboard applications. However, the classic elegance of Rustic Cedar is not restricted to just exterior applications. With its distinctive golden brown rings, it creates a “cathedral tracery” that provides individual character and beauty to wall panelling, ceiling sarking and other internal applications.

SIZES AND FINISHES

Profiles available in Rustic Cedar are commonly 19mm and 22mm thick with a bandsawn face finish. We do profiles ex 100, 150, and 200mm. For availability, custom sizes and profiles please contact us.

Disclaimer: JSC Timber recommends Rustic Cedar cladding to be fixed over cavity on a rigid wall underlay with an approved coating from a recognised manufacturer. It will help to achieve a good serviceable cladding for your next residential and commercial project. Profiles with a centre groove are not available in Rustic Cedar.
