## Very durable Australian timber perfect for decking and flooring

Naturally durable

Hardworking timber  
for flooring & decking

Straight, even  
grain and texture

Spotted Gum is a hard and durable Australian timber, ideal for flooring and decking applications. Highly resistant to decay and with natural oils, Spotted Gum both machines and finishes well.

Harvested from sustainably managed forests, JSC Spotted Gum often displays regional differences in colour, ranging from pale grey-browns and creams through to rich, chocolates and greens. The 'spotted' refers to the mottled colouring that forms on the exterior of the tree as it sheds strips of bark.

SPOTTED GUM INFORMATION SHEET | V2.2

## TECHNICAL INFORMATION

<b>Grain</b>	A frequent, wavy grain which can produce an attractive and high valued fiddleback effect. Texture moderately coarse.
<b>Density/ strength</b>	*Dry Density: 950 kg/m <sup>3</sup> **Janka Dry Hardness: 11 kN
<b>Durability</b>	Hard, durable and highly resistant to decay. A very tough timber. Often treated to enhance durability of sap or transition wood.
<b>Distribution</b>	Australian East Coast, South East Queensland to Northern regions of NSW.
<b>Working qualities</b>	Relatively easy to work, cuts easily and is also a good to fair bending timber
<b>Uses</b>	Applied and structural Flooring, Decking, Weatherboards, sleepers, bearers, board walks and the likes.

**Note:** For comparable species speak to the JSC team about alternatives.

**Disclaimer:** JSC has endeavoured to ensure this information is accurate but recommends that for critical applications independent advice is obtained. These properties are only a guide, as timber is a natural product there will be variations within any species. \* Air dry density (kg/m<sup>3</sup>) is average indication only and actual value may vary. \*\* The Janka Dry Hardness rating measures the hardness of the wood. The higher the rating the harder the wood. This information may be updated at any time.
