

TMT AMBA

Lighter Clearer Grade Thermally Modified Timber

Dimensional stability

Easy Maintenance

Responsibly sourced and non-toxic

For all climates

Certified premium quality

Beautiful grade & finish

JSC TMT Amba® is a premium Thermally Modified Timber product that offers excellent durability, stability, and consistent light golden brown tones. Its uniform colour makes it ideal for a range of styles and colour palettes.

Note: When fixing JSC TMT® products use stainless steel fixings only. For comparable species speak to the JSC team about alternatives.

TMT AMBA APPLICATIONS

Using only a natural thermal treatment process of heat and steam, the resulting durability of TMT Amba lends itself to a wide variety of applications:

- **External Cladding:** JSC TMT Amba cladding is available in a range of JSC TMT weatherboard and moulding profiles. Supplied in good average length spreads which allow for greater design possibilities and is the perfect material choice for your vertical and horizontal cladding. Covered under CodeMark® as per JSC cladding systems
- **Interiors:**
 - A favoured product for interior wall linings, mouldings, and battens.
 - Timber is free from treatment chemicals which eliminates the risk of harmful emissions.

Disclaimer: JSC has endeavored to ensure this information is accurate but recommends for critical applications that independent advice is obtained. These properties are a guide only, as timber is a natural product there will be variations within any species. Please speak to our professionals at JSC for information and advice as well as for any information around profiles, fixing details and supporting documentation.
